

# Day 01 Task

## **Q1. Problem Statement:**

You need to observe any 10 min delivery application such as blinkit, instamart, flipkart minutes, etc. Find out:

1. How they deliver items within 10 minutes.
2. How do they suggest you items?
3. What data points must they be tracking to ensure delivery?
4. What effect will those data points affect if they are changed?

## **Objective:**

Observe the application, do some research and note down the observations according to the problem statement.

**Q2. Read and write about at least 10 basic excel terms such as rows, columns, sheet, workbook, etc.**
